Business

Work Experience

Freelance Product Designer

Sep 2009 - Present

Visual design, UX, storyboarding, prototyping, wireframes, Photoshop, JavaScript, HTML, CSS etc. Evangelize for user experience and product strategy.

Designer at Yahoo

Jan 2014 - Jul 2016

Next gen messenger app for iOS. Designed new experiences for Yahoo Fantasy Sports for both Android and iOS. Visual design, interaction design, and prototyping primarily on mobile.

Product Design at Adherial

Mar 2013 - Dec 2014

Work with team of five software engineers, one HCI researcher, and three founders. Build prototypes. Designed iOS, Android, and desktop web apps.

Full Stack Developer at Connected Studios

Jun 2010 - Mar 2012

Children's flash game startup. Wrote Java on the backend and Flash, HTML, CSS and JavaScript on the front.

Notable Projects

Symphony RM SRM

2015 - 2016

Enterprise application for sales, patient and doctor tracking. Created brand, desktop and iPad design language. Programmed prototypes to communicate with engineers and for presentations with prospective customers.

mSecure iOS App

2015

Created brand, iPhone and iPad design language for mSecure. Store all your passwords in one secure location.

Pure News

2015

A news app I created for iOS in 2015. My node backend learns from a list of Twitter "influencers" the most important news of the day and displays it in a slick iOS UI.

And many more.
